PITCH DECK

# PANTHEON

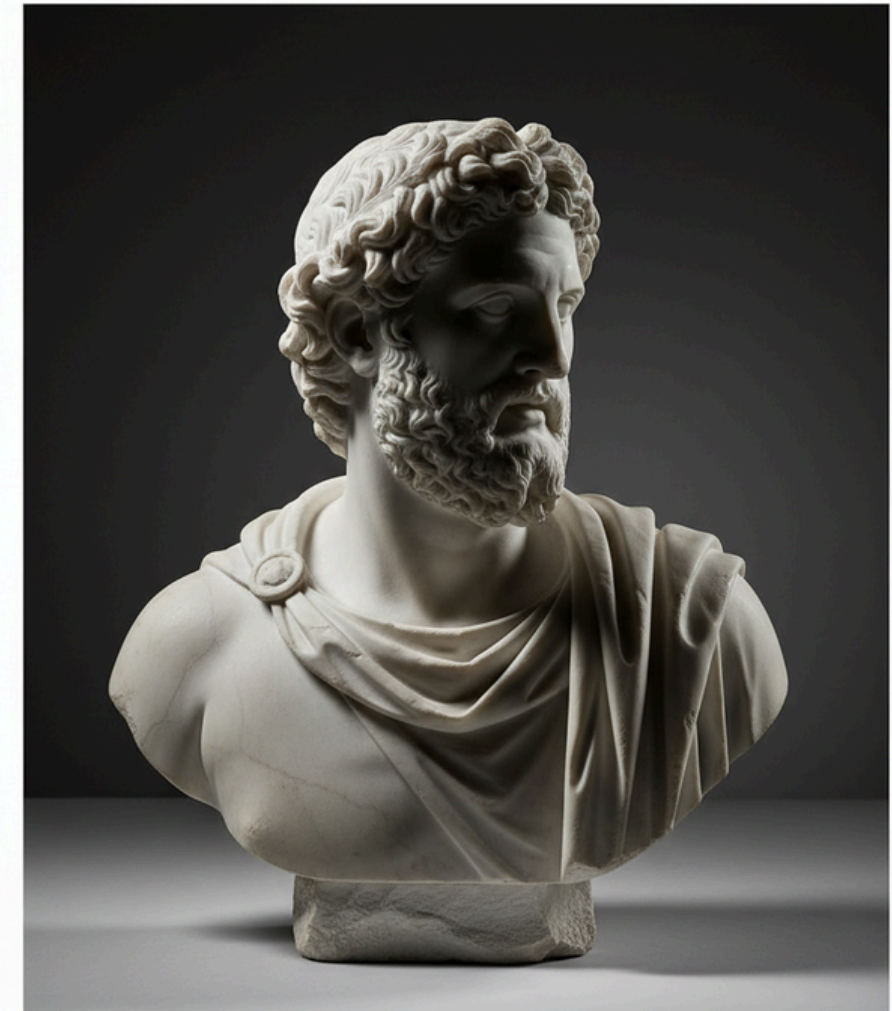

Introducing Creator Index Vaults

Crypto's First Ever Performance Primitive

**Crypto has 40 million  
tokens.**

**99.98% fail rate**

Better tokens on better rails = better outcomes.  
That's what we've built with Pantheon.

# The Creator Index

A new token class underwritten by value exponentials.

As the creator wins, holders earn yield.

# Why This Works

---

## Creators

Monetize their reputation. Turn dealflow into sustainable income. One token represents their entire pipeline.

---

## Projects

Gain instant distribution through trusted creators. Launch with built-in liquidity and attention from day one.

---

## Investors

Access curated dealflow with yield. Diversified exposure through a single token. Passive income from active ecosystems.

# Mechanically Superior Asset Class

BUILT-IN AT LAUNCH

---

Revenue.

---

Yield.

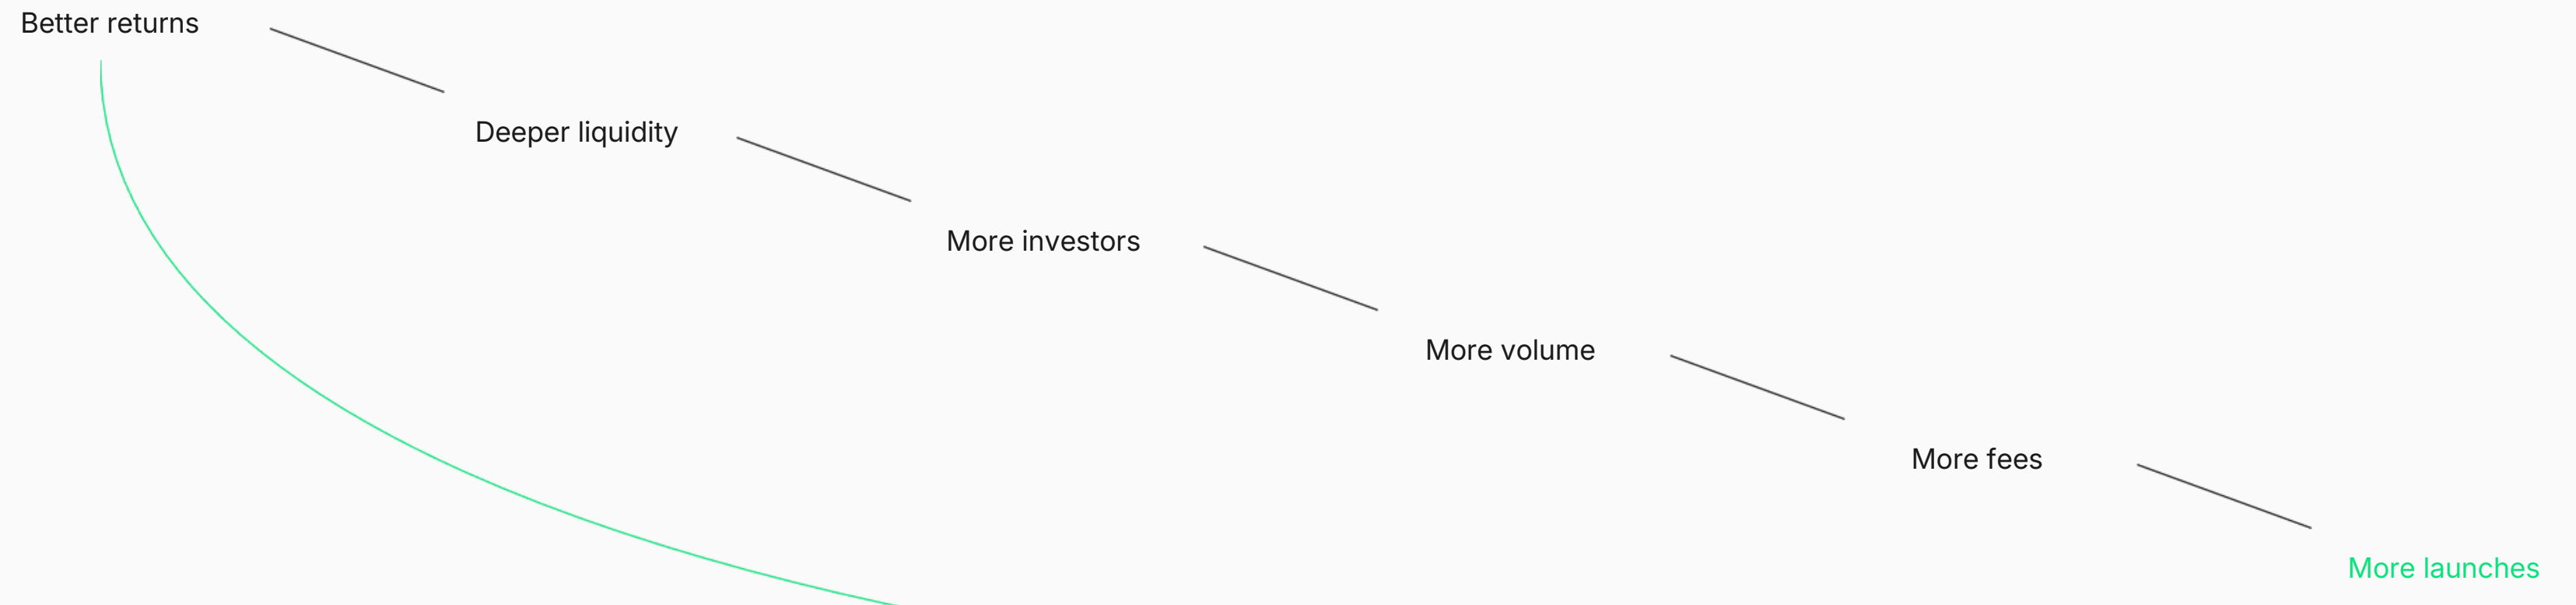

---

Distribution.

---

Every Pantheon token ships with revenue mechanics, yield distribution, and built-in liquidity from day one. No waiting. No promises. Live at launch.

# Better assets $\Rightarrow$ better markets $\Rightarrow$ bigger outcomes

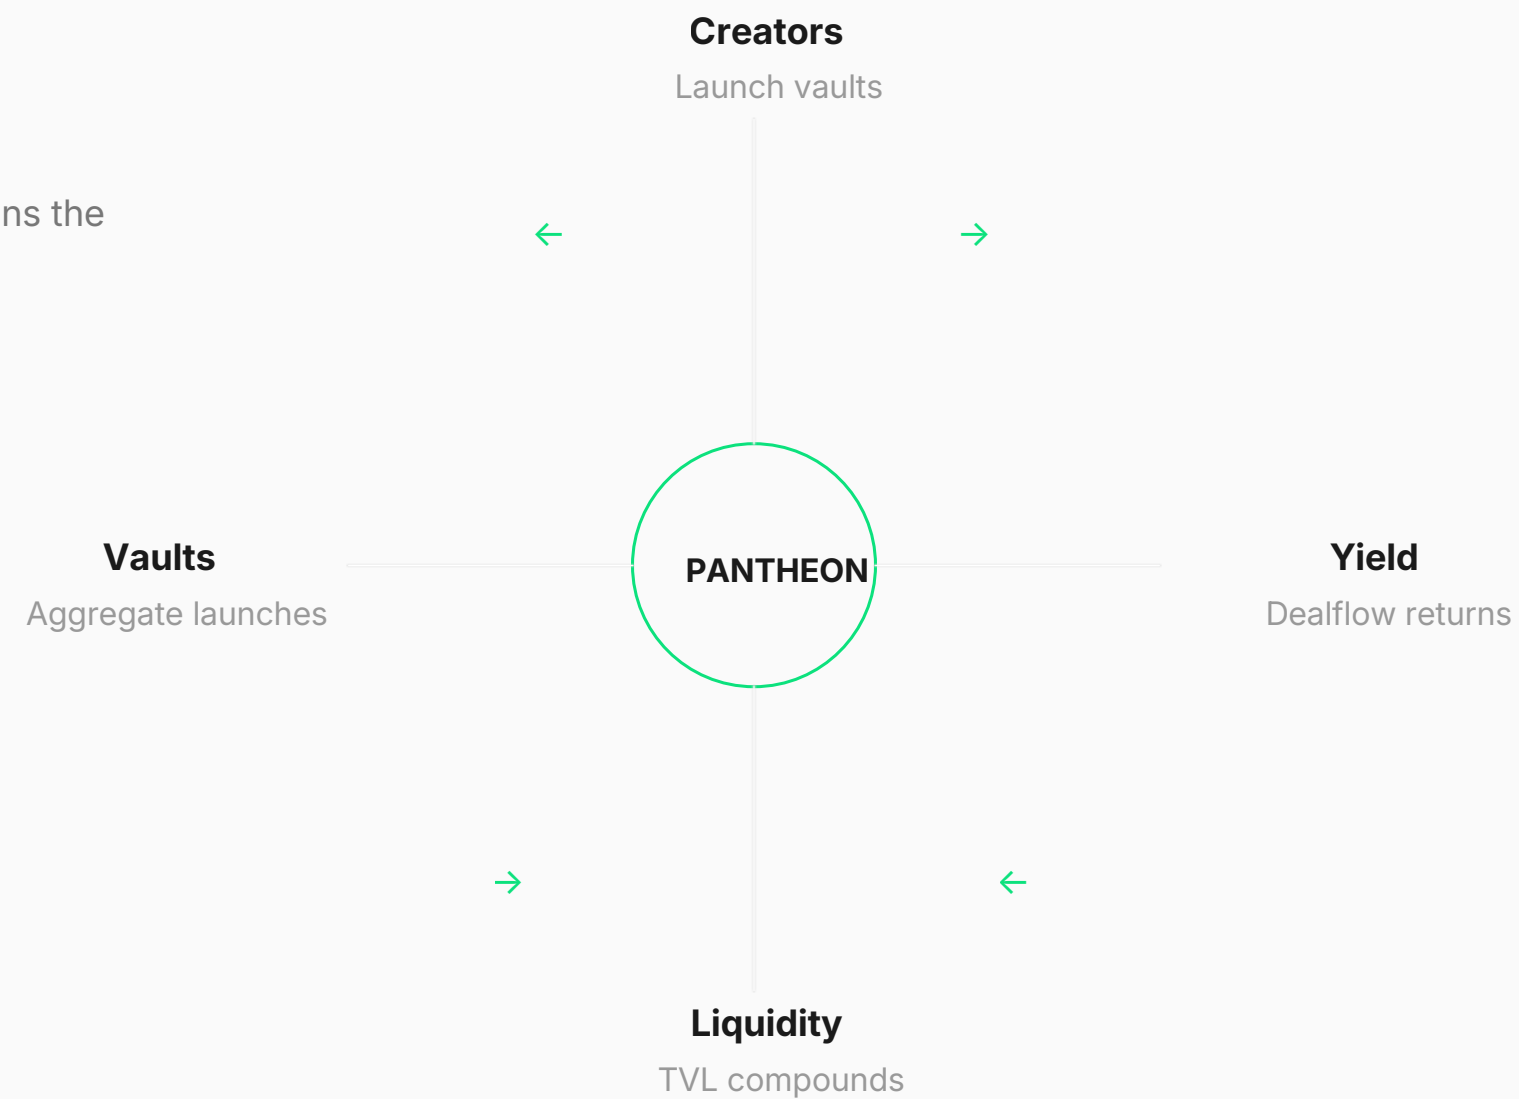

## SCALING MODEL

# The Flywheel

A self-reinforcing loop where each participant strengthens the system for everyone else.

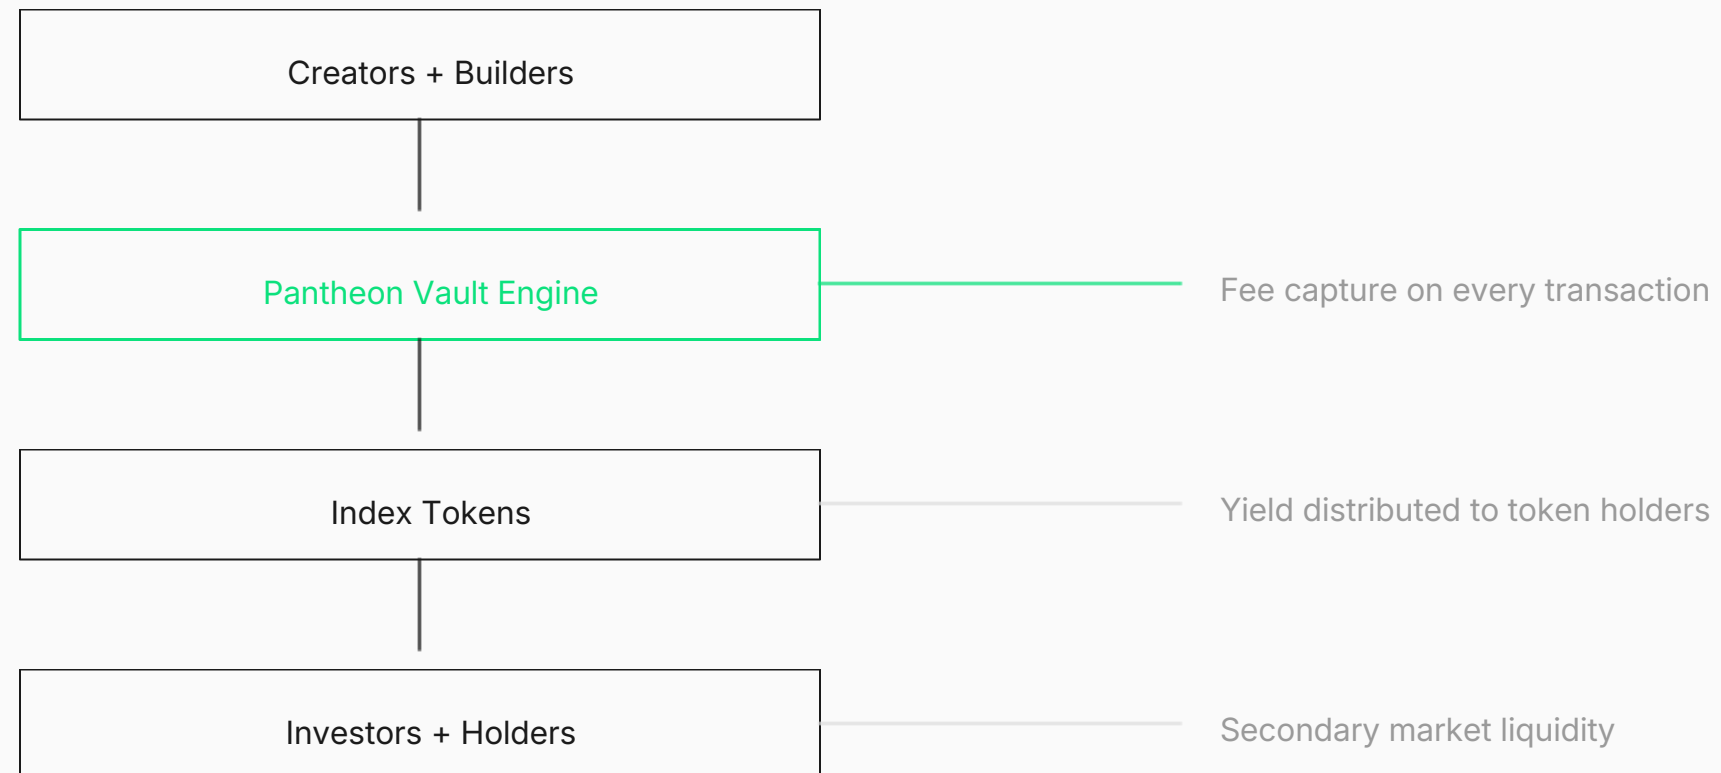

Creators bring dealflow. Vaults aggregate. Yield attracts liquidity. Liquidity attracts more creators.

# Protocol Architecture

---

How value flows through the system

# Market Size

---

The creator economy meets decentralised finance

**\$480B**  
Creator economy by 2027

**\$230B**  
DeFi total value locked

---

Pantheon

---

No one has built the bridge between these two markets

# Traction

Early signals validate the thesis

**12**  
Creators onboarded

**\$2.4M**  
Vault deposits

**18%**  
Avg. monthly yield

**47**  
Projects in pipeline

Q4 2025

# Competitive Landscape

Existing models fail at the structural level

	MEME COINS	SOCIAL TOKENS	PANTHEON
Revenue	None	None	Structural
Yield	None	None	Compounding
Risk model	High	High	Diversified index
Alignment	Adversarial	Adversarial	Full

## VISION

# Second-order effects.

## Fewer scams.

When creators are accountable to holders, the incentive to rug disappears. Reputation becomes the collateral.

## Real distribution metrics.

Vaults create transparent, on-chain performance data. Every launch, every return, every yield event is verifiable.

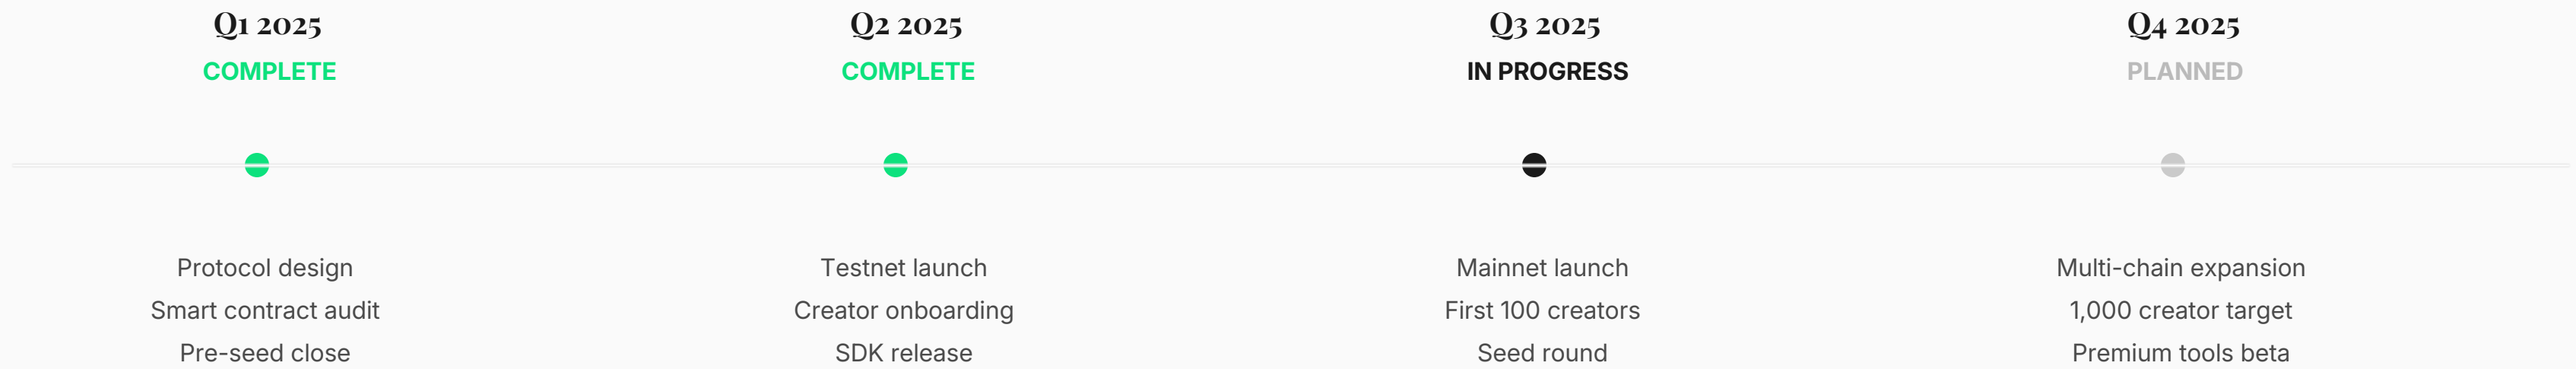

## Creator accountability.

Token holders become stakeholders. Creators who compound value attract liquidity. Those who don't, lose it.

# Roadmap

Execution timeline and key milestones

---

Shipping fast. Capital efficient. Milestone-driven.
